

# MAESTRO®

SELF-MAINTENANCE TOOLS | IMPROVING EFFICIENCY THROUGH AUTONOMY

Conduct your own symphony of productivity. Maestro® is iPipeline's low-code, self-service innovation which allows you to configure your own unique product forms, screens, rules, rates and more.

## TAKE CONTROL

Gone are the days of spending time in a service queue – with Maestro, the control is in your hands. Reduce your maintenance costs by creating and maintaining a central repository, and apply the resulting savings in time towards more important things.

## ELIMINATE REDUNDANCY

No one likes to make the same changes multiple times, so Maestro employs the “Build Once, Deploy Everywhere” method. Define your content and rules one time, and apply to all appropriate locations.

## CONSISTENT BRANDING

Maestro offers a Software Development Kit (SDK) so you can flexibly embed iGO screens in your agent/consumer portal, ensuring uniform style guidelines are met.

## FEATURES:

- Low code, easy to use interface
- Self-service product, rule, and rate changes
- Central repository of forms and rules
- Comprehensive screen designer kit
- Integration of unique branding assets

## BENEFITS:

- Accelerate speed to market
- Make changes on the fly
- Define once, apply everywhere- end duplicate work
- Customize workflows to suit your needs (required fields, follow-up questions, etc.)
